

## **Unit 03\_03\_Links**

1. What is a <div> tag? What are some differences between a <div> and a <section> tag?
2. What attribute usually appears in a <div> tag?
3. Write the link needed to go to <http://example.com>. The visible text should be "An Example."
4. What makes a relative address different than an absolute address?

## **01B\_Structure**

5. Suppose the page you are working on has a tag that looks like this: `<div id="geography">`. Write a link to go to the geography id for a link on the same page.

## **03b\_Uploading**

6. What do sftp programs do?

7. What does filezilla do?

8. Which version of sftp should you install in VS Code?

## **01D\_Servers**
